

Responsable Laboratoire Microbiologie & Stérilisation

With our headquarters in Göteborg (Sweden), Mölnlycke is one of the world leading manufacturers of single-use surgical and wound care products. With about 7500 employees in several units across the world, Mölnlycke has a € 1000K turnover. In Waremmе (near Liège), Belgium, we are about 350 collaborators working on the site.

Our Quality department is currently looking for a (m/f):

Head of Microbiology Laboratory (accredited ISO 17025) & Sterilization Owner

Function

Reporting to the Quality Manager, you manage a team of 3 people, you supervise the accredited microbiological laboratory and support the sterilization department.

You work in close collaboration with the Production, Sterilization, Purchases and HR departments.

Your main responsibilities consist in:

- . Analyze the feasibility of the testing from the internal customers
- . Control material and production area bio charge in accordance with corporate requirements. You approve and communicate results to customers.
- . Verify the necessary technical and human availability for testing
- . Manage the solution of the technical problems which appear in the laboratory
- . Continuously survey Qualification and Validation requirements for sterilization equipment
- . Assist actors in the Sterilization Qualification and Validation activities, in order to assure adequate contribution of key persons in their respective fields of responsibility.
- . Manage the Micro lab team and the QC Sterilization team (total : 3 persons) according to HR process.
- . You are prepared to travel 2 or 3 times/year in the world to participate in projects.

Profile

- . You preferably have a Master degree in sciences including microbiological content
- . At least 3 years of experience in sterilization (Radiation or EtO process) or accredited ISO 17025 laboratory.
- . You are excited to learn about sterilization technics and related ISO standards (ISO 11137, 11737, 14644,...)
- . You have also a good knowledge in Quality and ISO standards for Quality Management System (ISO 9001, 13485).
- . An experience in team management or knowledge in Healthcare is an asset.

- . Continuous improvement, customer-focused and results oriented are some of your personal skills.
- . You have excellent communication and leadership skills combining with a listening/collaborative and perseverance attitude, you can also demonstrate strong organization skills.
- . Having a high energy level to take initiative, you are able to anticipate, recognize and analyze potential risks and effectively create solutions.
- . Fluent in French, you have an excellent knowledge in English (spoken, written).

Offer

We offer you a permanent contract within a constantly evolving international group that offers the best products, technologies and services in its business sector.

The possibility of performing an evolutionary function giving a lot of autonomy and initiative and cooperate with colleagues invested in their job.

A strong training process focused on Radiation Sterilization.

The opportunity to integrate a human-sized structure with strong values: passion, learning, integrity !

If you are interested by this position, please send your CV and motivation letter in English by e-mail to Dany Bartholomé (dany.bartholome@molnlycke.com) by the 22nd of May.
